Media Hub

and 4C Radio

Department of Media Studies, Central Campus Christ University

As part of the emerging climate communication initiatives of the Department of Media Studies in collaboration with the Department of Life Sciences, we present to you the Media Hub. The Hub will serve as a facility for producing and disseminating reliable, engaging and socially relevant media content. It will offer students hands-on media production opportunities as part of their regular media classes and internships.

4C Radio, a fortnightly show, will focus on campus news, useful information. conversations with students, staff, and faculty too! It will also showcase creative talent - music and drama and all possible audio expressions. It will reflect the concerns of diverse communities, especially those on the frontiers of climatic and environmental change. Overall, the Hub will serve as a facility for producing and disseminating reliable, engaging and socially relevant media content.

FROM THE DESK OF

DR MELJO THOMAS

"4C Radio is a novel venture under Media Hub and Department of Media Studies, to tell socially impactful stories especially about climate, communication, using digital platforms, and to reach out to people to make them aware about issues in our society.

What has been done so far has been done right, through 21 episodes, covering variety of issues from cutting of trees in Gachibowli to multiple Campus news.

I congratulate the team - the coordinators and the students - who regularly give their time and energy to actually make it possible.

Looking forward to the socially impactful outcomes and proactive actions from people - a well-intentioned ripple effect that these podcasts are going to create.

When a forest is erased

Over 100 acres of forest were cleared inside the University of Hyderabad for commercial development, sparking protests from students and researchers. Students stood up, not just for nature, but for the soul of their campus. In this episode, we uncover a movement that asks: what kind of future are we shaping if we destroy what makes it worth living?

What do the trees
tell us???
Tree talks
With Dr. Padmakumar MM | Episode 4

Scan to listen

This episode dives into climate emergency and our action for mitigation and adaptation or the lack of it. Featuring Dr Padmakumar MM, it's a conversation about how stories are told and the impact they could have and why the way we talk about the environment matters more than ever.

FROM THE DESK OF

EDITORS

Six months ago, we remember trying to come up with a name and logo for the media hub that the department had envisioned. As we brainstormed and wrote and drew feverishly on the whiteboard, it emerged that we - the students and teachers - really wanted to tell the stories of people around us, tell them well and share it with the whole world.

Commons, communities and climate are deeply interconnected and communicating those stories is essential. We want to - not just increase awareness but also speak truth to power, hold the powerful accountable and strive for a just society, thereby upholding all the democratic responsibilities of journalism.

Having students lead this endeavor is crucial for the simple reason that the future belongs to them. Giving them the platform, opportunity and the tools to research, question, tell, and disseminate these stories will be the best that we as a media department can do for our society.

4C Radio is a start. Twenty one episodes and counting. We are working to make 4C Media Hub an exciting and robust space for all future journalists.

Join us for the ride?

- Prof Prachi Pinglay and Dr Kailash Koushik
